**HERE GOES THE TITLE OF THE PAPER. ONE CAN USE
LINE BREAKS
TO GET A MORE NATURAL LOOK OF THE TITLE**

AUTHOR'S NAME*

Abstract. Abstarct - NECESSARY! Please do not use author defined macros in the abstract and avoid references to anything in the paper.

1. SECTION TITLE

⁰ Here insert your text. If there are subsections, then you may use:

1.1. **Subsection title.** Proclaims (theorems, propositions,...) should be inserted as follows:

Theorem 1.

Proof. Text of the proof. Displayed equations should be typeset using `equation` environment if numbered:

$$\zeta_k(x) \equiv Li_k(x) \equiv \sum_{r=1}^{\infty} \frac{x^r}{r^k} \quad (k \geq 0) \quad (1.1)$$

```
\begin{equation}
\zeta_k(x) \equiv Li_k(x) \equiv \sum\limits_{r=1}^{\infty}
\frac{x^r}{r^k} \quad (k \geq 0)
\end{equation}
```

Non-numbered displayed equations can be typeset using

$$e^{i\pi} = -1$$

In such a stated version the equation will not be enumerated.

The symbol for the end of proof will appear automatically. \square

Equations should be displayed *only* if they must be enumerated for future reference or if they are to long or complicated. Please *do not* enumerate displayed equations that are not referred to.

2000 *Mathematics Subject Classification.* Primary NECESSARY!!!; Secondary OPTIONAL..

Key words and phrases. keywords should be put here.

^{0*} Here goes some paper related information, like Research support etc.
