

Д О Д А Т О К

Научни трудови објавени од професор Ѓорѓи Чупона што не се вклучени во оваа книга

1. On some primitive classes of universal algebras, *Mat. vesnik, Beograd*, 3 (18) (1966), 105–108
2. Финитарне асоцијативне операције, *Математичка библиотека, Београд*, 39 (1969), 135–149
3. Correction of a statement of the paper “On some primitive classes of universal algebras”, *Мат. весник* 6 (21) (1969), њ. 354
4. Polyadic subsemigroups of semigroups, *Algebraic Conference, Skopje 1980*, 131–152 (Ѓупона G., Celakoski N.)
5. Subalgebras of commutative semigroups satisfying the law $x^r = x^{r+m}$, *Zbornik radova Prir.-mat. fak. N. Sad*, 11 (1981), 217–230 (Ѓупона G., Vojvodić G., Crvenković S.)
6. Проширувања на алгебарски структури, *Pristapni predavanja, MANU, Skopje*, 1982, 247
7. Post theorems for unary algebras, *Proc. Symp. n-ary Structures, Skopje 1982*, 71–84 (Ѓупона G., Celakoski N., Samardžiski A.)
8. Roots of permutations, *Proc. Symp. n-ary Structures, Skopje 1982*, 85–95 (Ѓупона G., Celakoski N., Samardžiski A.)
9. Representations of semigroups of operations in semigroups of left translations, *Proc. Symp. n-ary Structures, Skopje 1982*, 209–222 (Ѓупона G., Crvenković S., Vojvodić G.)
10. Embeddings of associatives in semigroups, *Proc. Symp. n-ary Structures, Varna 1983*, 71–78 (Ѓупона G., Celakoski N.)
11. Векторско вредносни алгебарски структури, *pregledno predavanje, V Konferencija “Algebra i Logika”, Cetinje 12–14 jun 1986, str. 2–7* (Celakoski N., Ѓупона G.)
12. Vector valued groupoids, semigroups and groups, *Vector Valued Semi-groups and Groups, Maced. Acad. of Sci. and Arts, Skopje 1988, str. 1–78* (Ѓупона G., Celakoski N., Markovski S., Dimovski D.)
13. Introduction to combinatorial theory of vector valued semigroups, *Vector Valued Semigroups and Groups, Maced. Acad. of Sci. and Arts, Skopje 1988, str. 141–183* (Ѓупона G., Markovski S., Dimovski D., Janeva B.)
14. Embeddings of universal algebras in semigroups, *Mat. Bilten Makedonija*, 15 (XLI) (1991), 5–16 (Ѓупона G., Markovski S.)
15. Canonical groupoids with $x^m y^n = xy$, *Mat. Bilten Makedonija*, 23 (XLIX) (1999), 11–18 (Ѓупона G., Celakoski N., Janeva B.)
